**Projects**

---

**eJob Circular Management Application**

By using this software, a recruiter can post their job circular and an applicant can apply for job.

A recruiter can take mock test through this applicant. Applicant will get the notification if he shortlisted for the job and many more features (under development). I have use asp .net core 5.0 rest API for the backend and angular 12 for frontend. I have hosted this application at GitHub pages (Frontend - Angular) and Heroku - Docker (Backend - Asp .net core API). Here is the link

<https://faruqe25.github.io/e-Recruitment>

**Covid'19 Tracking Application**

In this project I have used Blazor frontend framework which is the latest frontend framework of .Net. This application provides the number of covid patient country wise. I have used third-party API for getting the covid patient data. My application is hosted at <https://faruqe25.github.io/Covid19tracking/>

**Chat Application**

In this project I have used singalR to add the Realtime functionality to the application. This application provides the facility to communicated with other people through text only. I have used asp .net core 3.1 framework and MSSQL for the database. My source code in available at GitHub ( <https://github.com/faruqe25/RealTimeChatApp> )

**Restaurant Management Application (Group Project)**

In this project we have used Asp .Net Core 3.0 framework and MSSQL database. By using this software, a customer can order food and reserve table, a manager can manage the account and order process, a stock manager can manage the ingredient stock. Our source code is available is at GitHub ( [https://github.com/faruqe25/Team\\_TOR](https://github.com/faruqe25/Team_TOR) )

## **Bus Ticket Management Application**

By using this software, a customer can buy ticket and download the ticket. A bus company can manage whole ticketing system through this software. I have used Asp .Net Core 2.0 for this application. My source code is available at GitHub ( [https://github.com/faruqe25/Bus\\_Ticket\\_Management](https://github.com/faruqe25/Bus_Ticket_Management) )

## **School Management Application**

By using this applicant, a school can manage their all activities like exam management, student management, result management, teacher management etc. I have used Asp .Net Core 2.0 for this application. My source code is available at GitHub ( <https://github.com/faruqe25/SchoolManagement> )

## **Language Skills**

---

Mother tongue(s):

**Bengali**

Other language(s):

**English**

**LISTENING B2 READING B2 WRITING B2**

**SPOKEN PRODUCTION B2 SPOKEN INTERACTION B2**

## **Skills**

---

**Programming Language:** C#, Java, C, C++

**Back-end Framework:** ASP .Net Core, ASP .Net Web Form

**Front-end Framework:** Angular 12

**API:** Asp .Net Core Rest API

**Database:** MSSQL Server, PostgreSQL

**Query Language:** LINQ, SQL

**Front-end:** JavaScript, JQuery, HTML, CSS, SignalR, AJAX

**Architectural Pattern:** MVC

**Version Control:** Git, GitHub, Bitbucket

**Architecture:** 3-tier Architecture, Onion Architecture

**Tools:** Docker
